

# THE MOSLER SAFE COMPANY

**The Largest Manufacturers of Burglar and Fire Proof Safes and Vaults in the World.**

Hamilton's industries are many and varied, but perhaps there is none that has done more to spread her name abroad as a manufacturing center than the Mosler Safe Company. The now thriving suburb of East Hamilton dates her beginning from the day when the ground was broken there for this industry. Not only East Hamilton, but Hamilton herself has felt the stimulus of this big concern's presence in the community and it has been of inestimable advantage to the town in more ways than one.

The phenomenal rise of the Mosler Safe Company to the first place among the safe makers of the world has been largely due to the indomitable push and progressive spirit shown by the company's representatives. With their experience of many years and with peculiar qualifications for business, they have done marvels in placing the concern on a basis second to none in the industrial world.

This company, recognized as the foremost safe and bank vault builders in this country, if not of the world, was formed and established in Cincinnati. The modest factory's capacity in the beginning was soon out-grown, a new and more commodious location was secured and then a third one in Cincinnati. But the product of the plant continued to expand, new buildings were erected and the facilities extended to their utmost until there was no longer room or place to fill the orders.

Then an entirely new factory was projected and built on Front street, Cincinnati, and was devoted entirely to burglar proof safe work. But the demand for the product became so great that again an overflow of capacity was occasioned. It was then determined that more room must be secured and Hamilton was selected as the place of location. This project and idea was intelligently carried out, land was purchased on the present site, the splendid and magnificent factories that stand there today were erected and equipped and stand first today among the institutions which have given to Hamilton its fine and foremost industrial reputation among the Ohio cities and to the Mosler Safe Company the national and international character and reputation which it enjoys today.

Even upon the location of the company here, the buildings were comparatively modest; but additions and extensions have been made so as to make the Mosler Safe Company one of the greatest manufacturing plants in the country. It occupies over twelve acres of land and its shipping facilities are unequalled. Located, as the immense plant is, on three lines of railway systems it has an access to prompt delivery which is nowhere excelled.

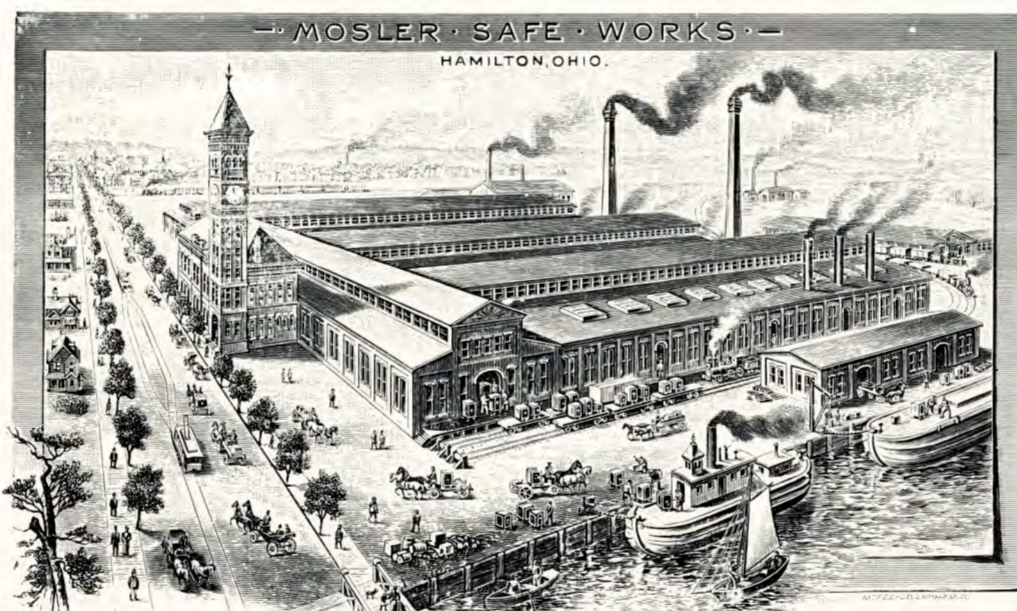

The Mosler Safe Company, in the development of its organization, has worked a revolution in the safe trade. The Moslers made a profound study of the business. They were constantly studying and contriving and aided by their natural genius and ingenuity and fine business perceptions, they solved the problems successfully.

W. MOSLER.

M. MOSLER.

A BIRDEYE VIEW OF THE MOSLER SAFE COMPANY.

The safes of the Mosler Safe Company are built upon the most advanced scientific principles, their devices are guarded by exclusive patents, and every component part of their safes are especially selected and inspected. From the high excellence of their product they never deviate from one price and put only the best market standard in the country.

The company, among its other products, manufactures under its own patent, the Mosler Patent Fire-Proof Safes, Mosler Patent Fire-and Burglar-proof Safes, Mosler Patent Screw-Door Bank Safes, Mosler-Corliss Patent Bank Safes, Mosler Patent Manganese Steel Bank Safes, Bank Vault and Safe Deposit Work.

To illustrate the character of this company's product it is only necessary to state that every bank in Hamilton and Cincinnati, which is in the heart of the safe industry, is using Mosler work, and besides more than 50 per cent of the banks in the United States are using, or have contracted for, Mosler work, including the principal banking institutions, such as The Guaranty Trust Company, New York City, the New York Safe Deposit Company, in the Singer Building, in New York City. The Chemical National Bank, New York City, Importers' and Traders' National Bank, New York City, First National Bank, Chicago, First National Bank, Cincinnati, The Hibernia Savings Bank and Trust Company, New Orleans, Third National Bank, Atlanta, Merchants' National Bank, Los Angeles, Omaha National Bank, Omaha, City National Bank, Omaha, First National Bank, Denver, Portland Trust Company, Portland, Ore., First National Bank, Boston, Commonwealth Trust Company, Boston, and a great many others too numerous to mention.

The company has established many agencies throughout this country and abroad and their business from their present large volume is continually growing and extending. The firm has a world-wide fame and has been a large benefactor to the city of Hamilton. M. Mosler, president, and W. Mosler, treasurer, while men of fine, shrewd and sagacious business ability, have ever been liberal and open-hearted in their charities and generous and encouraging to the deserving. They have founded homes, furnished employment to those who occupy them, and established a means of paying for homes; and they have been benefactors in every sense of the word and have well deserved the high meed of success which has been accorded them.

The company's plant in East Hamilton is easily conceded to be the largest and best equipped safe manufactory in the world. It is provided with the latest and most modern machinery, is furnished with its own electric and power plants, employs on an average about one thousand men a day, and is throughout, one of the most model manufacturing plants in this country.

The business of the company extends to all parts of the civilized world and its output has not only a national but an international market and reputation.

**NATIONAL BANK BONDS**  
LATEST IMPORTANT AWARD  
MADE BY THE  
U. S. GOVERNMENT

WASHINGTON, D. C., Oct. 28, 1908  
The circulation bonds of all of the United States National Banks will soon be deposited in a new and special Burglar-Proof and Fire-Proof Bank Vault to be constructed by The Mosler Safe Co., of Hamilton, Ohio. This Company has recently installed the most improved and secure safety deposit bank vaults in the world for the Singer Building, New York Safe Deposit Co., Chemical National Bank, Importers & Traders National Bank, Mercantile National Bank, all of New York City, as also for other large banks in all the principal cities of the United States.

This award to The Mosler Safe Co., universally conceded the largest safe company in the world, does not only speak volumes for the superior work constructed by this company, but places the United States government in a position to proclaim that the largest and most complete safe works in the world is located in the United States.
